

MOHAMMED AL-QURAINI

AI Engineer | LLM Agents, RAG, and Arabic-English Document Workflows

alquraini.dev@gmail.com | +968 7711 3828 | linkedin.com/in/mohammed-al-quraini | github.com/moasq | Muscat, Oman

PROFESSIONAL SUMMARY

AI Engineer with 7 years in software engineering and applied AI work since 2023. Builds **Python** and **Go** agents, **RAG** pipelines, and Arabic-English document workflows using **LangChain**, **LangGraph**, hybrid retrieval, and human approval before consequential actions.

TECHNICAL SKILLS

AI & LLM Systems: **LangChain**, **LangGraph**, **Eino** (Go), LLM API integration, agent workflows, tool calling, human-in-the-loop review

RAG & Retrieval: Retrieval-augmented generation (**RAG**), embeddings, vector search (**pgvector**), **BM25** lexical search, **Voyage** reranking

Backend & Data: **Python** (**FastAPI**), **Go**, **RESTful APIs**, **PostgreSQL**, **GCP** (**Cloud Run**)

Languages: Arabic (native), English (fluent)

PROFESSIONAL EXPERIENCE

Software Engineer (Backend / Web Services) | Independent / Contract

Jan 2025 – Present

Remote

- Built accounts-payable agents in **Go** and **Python** with **Eino** and **LangGraph** for three Gulf client deployments; the anchor distributor processes **2,000-3,000 invoices monthly**.
- Processed Arabic and bilingual supplier invoices through cross-checked **Mistral AI** and **Google Vision AI** OCR, followed by validation and human approval before posting. A production **MCP** server centralizes ERP credentials, validates typed tool calls, and records an audit trail.
- Combined **PostgreSQL** exact-match rules with **BM25**, **pgvector** semantic retrieval, and **Voyage** reranking to surface OCR-drifted near-duplicates and fraud signals for human review.
- Integrated reconciliation and ERP posting for **Xero**, **NetSuite**, and **QuickBooks**; the overall automated workflow reduced the anchor client's AP cost about **70%**, with **\$9-12 monthly LLM spend**.

Software Engineer (Backend / Cloud) | Oman Real

Feb 2024 – Present

Muscat, Oman (Hybrid)

- Built **Golang** backend services and **RESTful APIs** serving **200,000 users**; reduced query latency **40%** through **Redis** caching and **PostgreSQL** index optimization.
- Automated **Docker** builds and zero-downtime deployments through **GitLab CI/CD** to **GCP Cloud Run** and **Kubernetes**, maintaining **99.8%** uptime with **Prometheus** and **Grafana**.

Software Engineer (Full Stack / Cloud) | Ticket Travel & Tourism

Jul 2023 – Feb 2024

Muscat, Oman

- Built a 2023 travel-plan **RAG** workflow with **LangChain** over a **ClickUp**-synced catalog; generated itineraries passed through human email approval.
- Developed **Angular** and **TypeScript** interfaces over **Golang RESTful APIs**, deployed with **Docker**, **GCP Cloud Run**, **Cloud SQL**, and **Terraform**; cut infrastructure costs **30%**.

Software Developer | Altec LLC (Contract)

Dec 2022 – Jun 2023

Alabama, USA (Remote)

- Developed **Java Spring Boot** backend services for mobile products, containerized with **Docker** and deployed on **Kubernetes**.

Software Engineer | JPMorgan Chase, eBay (Contract)

Mar 2021 – Nov 2022

Chicago, IL (Hybrid), New York, NY (Remote)

- At **JPMorgan Chase**, developed secure financial application features, integrating biometric authentication and encryption protocols while following **SOC2** controls.
- Built automated testing and deployment pipelines with **Jenkins** and **SonarQube**; contributed to backend microservices on eBay's high-traffic marketplace.

Full Stack Developer | Bizzie Co. / Knowticed

May 2019 – Dec 2020

Miami, FL (Remote)

- Built cross-platform applications with **Flutter**, **Swift**, and **Kotlin**, backed by **Golang** and **Node.js** microservices; reached **3,000+ users** in the first month with zero downtime.

PROJECTS

- Oratori.app: Shipped an AI speech coach for **iOS** using **Speechmatics** speech recognition, prosody analysis, and multiple **LLMs** via **OpenRouter** to score pace, structure, and delivery.
- Meeticule.com: **Python/Go** NLP meeting-audio analysis engine with a **RESTful API** deployed on **Cloud Run**.
- Nanowave: Open-source **CLI** that uses **Claude Code** agents to generate, compile, and run **SwiftUI** apps from natural-language prompts.
- production-saas-starter: Open-source **Go** and **Next.js** B2B starter with **JWT/SSO**, org-scoped roles, **multi-tenant RBAC**, and security middleware. Designed the auth architecture with **Stytch** as the identity-provider adapter.

EDUCATION

BS in Computer Engineering, Cleveland State University, Cleveland, OH (Sep 2017 – May 2021)
