

# MOHAMMED AL-QURAINI

Full Stack Engineer | Node.js, React, Angular, and Backend APIs | 7 Years Shipping Products

alquraini.dev@gmail.com | +968 7711 3828 | linkedin.com/in/mohammed-al-quraini | github.com/moasq | Muscat, Oman

---

## PROFESSIONAL SUMMARY

Full Stack Engineer with 7 years building API-backed products. Shipped JavaScript and TypeScript interfaces in React and Angular over backend services, including Go APIs serving 200,000 users. Combines client-side delivery, Node.js and Go services, database-backed integrations, and production deployment across cloud environments.

---

## TECHNICAL SKILLS

**Full Stack & Frontend:** Node.js, JavaScript, TypeScript, React, Next.js, Angular, HTML/CSS

**Backend & APIs:** Golang, Python (FastAPI), RESTful APIs, microservices, integrations and webhooks

**Data:** PostgreSQL, Redis, MongoDB, Firebase, SQL query optimization and indexing

**Cloud & Delivery:** GCP (Cloud Run, Cloud SQL), Docker, Kubernetes deployments, Terraform, CI/CD

---

## PROFESSIONAL EXPERIENCE

### Software Engineer (Backend / Web Services) | Independent / Contract

Jan 2025 – Present

Remote

- Built accounts-payable automation in **Go** and **Python** for three Gulf client deployments; the anchor client processes **2,000-3,000 supplier bills monthly**.
- Combined **PostgreSQL** rules with **BM25/pgvector** retrieval and **Voyage** reranking to identify duplicate invoices whose OCR differed, routing suspicious matches to human review.
- Automated validation, human approval, ERP posting and reconciliation, reducing the anchor client's overall AP costs by about **70%**, from approximately **\$2,000 to \$610 monthly**.

### Software Engineer (Backend / Cloud) | Oman Real

Feb 2024 – Present

Muscat, Oman (Hybrid)

- Built **Go RESTful services** for **200,000 users**; profiled the data-access layer, found N+1 queries, and used **Redis** caching and **PostgreSQL** index changes to reduce query latency **40%**.
- Automated **Docker** builds and zero-downtime **GCP** deployments through **GitLab CI/CD**; operated **Kubernetes** deployments and maintained **99.8% uptime** with **Prometheus** and **Grafana**.
- Integrated **Paymob**, **Apple Pay**, and **Stripe** payment workflows with webhook-driven processing and idempotent handlers for production traffic.

### Software Engineer (Full Stack / Cloud) | Ticket Travel & Tourism

Jul 2023 – Feb 2024

Muscat, Oman

- Built responsive **Angular** and **TypeScript** interfaces over **Go RESTful APIs**, deploying **Docker** microservices to **Cloud Run** and **Cloud SQL** with **Terraform**; reduced infrastructure costs **30%**.
- Developed a 2023 travel-plan automation workflow using **LangChain**, **GPT-4** and **GPT-3.5** retrieval over a **ClickUp** catalog, with human approval before itinerary emails were sent.

## Software Developer | Altec LLC (Contract)

Dec 2022 – Jun 2023

Alabama, USA (Remote)

- Developed **Spring Boot** services for mobile products, packaged them with **Docker**, and deployed on **Kubernetes**; used Instruments profiling while building **SwiftUI** applications.
- Built **SwiftUI** features with **MVVM**, **Combine**, and **Core Data**, contributing to a **25% increase in user engagement**.

## Software Engineer | JPMorgan Chase, eBay (Contract)

Mar 2021 – Nov 2022

Chicago, IL (Hybrid), New York, NY (Remote)

- Developed secure financial application features at JPMorgan Chase for a service used by millions, applying **SOLID** principles and integrating biometric authentication and encryption under **SOC2** requirements.
- Built **Jenkins** and **SonarQube** pipelines for automated testing and deployment, and contributed to backend microservices on eBay's high-traffic marketplace platform.

## Full Stack Developer | Bizzie Co. / Knowticed

May 2019 – Dec 2020

Miami, FL (Remote)

- Built **Flutter**, **Swift**, and **Kotlin** applications with **Go** and **Node.js** microservices, reaching **3,000+ users** in the first month.
- Added **RESTful APIs**, **Firebase** integration, and cloud-based data storage using MVC and Observer patterns.

---

## PROJECTS

- production-saas-starter: Open-source **Go** and **Next.js** B2B SaaS starter with **hexagonal architecture**, **JWT/SSO**, multi-tenant RBAC, and security middleware; **527 GitHub stars**. Owns JWT verification, JWKS caching, session enforcement, organization-scoped roles, rate limiting, and request sanitization behind a replaceable identity-provider adapter.
- Meeticule.com: **Python/Go** meeting-audio analysis engine with a **RESTful API** deployed on **Cloud Run**.

---

## EDUCATION

**BS in Computer Engineering**, Cleveland State University, Cleveland, OH (Sep 2017 – May 2021)
